CP-8 Housing Cat. No. 1080

for Nikon Coolpix 5700 and 8700 Cameras.

CP-8N Housing Cat. No. 1090

for Nikon Coolpix 8800 Camera.

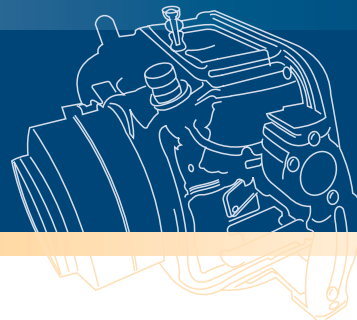

Fantasea CP-8 Housing Series:

The Fantasea CP-8 and CP-8N housings are designed with a unique air lock system for sealing the camera and allowing the water to exert even pressure on the O-ring, thus increasing the reliability of the watertight seal. The housings have a Nikonos 5 pin socket for hot shoe connection for an external flash and an ergonomically designed handle that supports a flexible arm for attaching the flash. The CP-8 and CP-8N have a visible main O-ring for a final pre-dive check and double O-ring design on all controls.

These polycarbonate injection molded housings are rated to a maximum working depth of 90m/300 ft. Included in the price is one year free D.E.P.P. flood insurance policy. Accessory products include: red filters, trays, flex arms, digital flash, underwater lights and more.

Full camera control functions including:

- On/off control
- Full camera mode select
- Macro/wide angle and zoom function
- Manual control
- Playback and trash
- White balance
- And more...

DSLR Housings

6
/ page

Fantasea's housings for Digital SLR cameras are compact, lightweight, injection molded polycarbonate housings with ergonomically designed handles, for easy handling and use. The interchangeable port systems accommodate a wide variety of SLR lenses, allowing photographers to capture the widest variety of superior underwater images. The housings feature a unique o-ring and gasket seal, stainless steel latches and are rated to a depth of 200 feet (60m). The camera "slides" into the housing on a specially designed tray. Once inside the housing the latching buckles on the back door are snapped shut sealing the system with a sound watertight seal.

A complete accessory system is available for the Fantasea DSLR housings including: port systems, port brackets, flash systems and modeling lights, red filters, arms, protective bags and covers. Included in the prices is one year free D.E.P.P. flood insurance policy.

FD-70 Housing *Cat. No. 1100* for Nikon D-70, D-70S w/ standard 18-70 mm Port included

Among the key features and controls for the FD-70 housing:

Fantasea Lens Port System

10
/ page

Fantasea Line DSLR Housing Systems come with standard Flat ports. In addition we offer a range of Flat and Dome ports to accommodate a growing Range of Digital lenses from Fisheye to Super Macro.

The ports use a threaded screw on system with double o-ring seal for added protection. Most Sea and Sea ports using a screw on system (not bayonet) will accommodate the Fantasea Line Housings.

The table below lists the available Port systems and only some of the Lenses they accommodate. There are many more and we can help you determine if your lens can work with our Port system. The Port diameter column on the right helps determine the type of Lens Port Bracket which fits any particular housing.

DSLR Housing Flat Ports

Cat No.	Port description (length/thread mm)	Lenses Accommodated mm.	Fantasea Housing	Diameter for Port brackets in mm.
7010	Flat port (27/92)	Nikon D70 kit standard lens (18-70 not full extension) & more.	FD70	101
7004	Flat port (33/92)	Nikon D50 kit standard lens (18-55) not full ext. & more.	FD50	92
7020	Flat port (47/92)	Nikon 60 mm macro, & more.	FD70	92
7030	Flat port (82/92)	Nikon 105 mm Macro Lens, & more	FD70	92
7008	Flat port (34/104)	Canon 18/55 mm standard kit lens & more. Comes with zoom control.	F350D	104
7035	Flat port (76/104)	Canon 100 mm macro lens & more	F350D	104

DSLR Housing Dome Ports

Cat No.	Part description	Port Thread mm.	Lenses/Ports Accomodated	Housing
7040	5" Dome Port	92	Nikon 16 mm and Sigma 14, 15 mm wide angle lenses and more	FD50, FD70
7045	5" Dome Port	104	Sigma 10-20 mm Fisheye, Canon EF-S 10-22 mm, Canon FE-S 18-55mm, and more	F350D

Housing Port Brackets

11
/ page

Fantasea Line offers single and double Lens Port Brackets which allow for easy connection of U/W lighting systems (modeling light, video light, diving light) to any Housing system. Easy to attach and remove. The Lens Port Bracket is made from tough rust proof metal and polycarbonate plastic and comes in varying sizes determined by the band diameters. The Brackets come with T1 connectors and 7mm Flex arms for easy assembly to the U/W lighting system.

Single Lens Port Brackets for Modeling Lights

Come with a 7 cm. flex arm and one T1 connector for attaching lights.

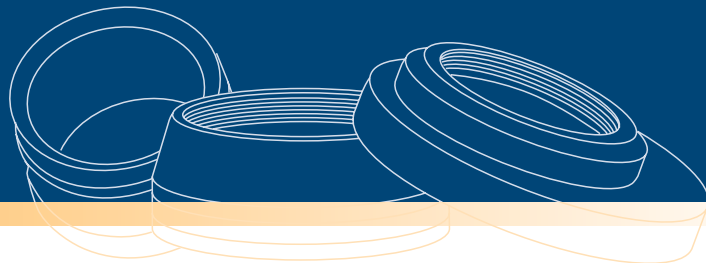

Cat No.	Part description	Bracket band Diameter mm	Camera Lens/Fantasea Lens Port Accomodated mm/ Cat. No.	Fantasea Housing

Conversion Lens Sets & Lens Holders

12
/ page

Macro/Wide Angle Conversion Lens Sets

for Fantasea Coolpix Housings and other major housing brands. The Lens Sets are held in place on outside of lens port by o-ring friction. The Macro lens section has an adaptor section which fits over the lens port on one side and has threads which connect to the Wide Angle section on the other. In other words the photographer can use this unique Conversion lens system to shoot either Macro or Wide Angle. When not using lenses they can be easily stored on the Lens Holder/Caddy (see table below). Fantasea Line offers an extensive selection of Red Filters that fit over the Conversion lenses (see Red Filter section of catalogue).

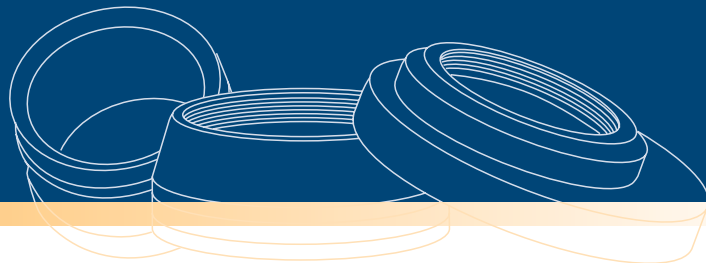

Cat no.	Part description	Lens Diameter/(Angle of Coverage)	Housing
5130	Conversion macro/wide angle lens set 48	48 mm/(24 mm) wide angle lens	CP5, CP7
5010	Conversion macro/wide angle lens set 55	55 mm/(24 mm) wide angle lens	CP3, CP3N, CP6
5120	Conversion macro/wide angle lens set 56	56 mm/(24 mm) wide angle lens	CP4 Sport, CP4 Pro, FP1

Lens Holders

Lens Holder (Caddy) – with T2 connector attaches to Flex arm and allows for easy and secure attachment of accessory lenses or filters

Cat no.	Part description	Lenses Accommodated	Red Filter Accommodated	Housing
4060	Lens Holder 48	48 mm	Red Filter 48	CP5, CP7
4070	Lens Holder 55	55 mm	Red Filter 55	CP3, CP3N, CP6
4082	Lens Holder 79.5	56 mm	Red Filter 56 and Red Filter 79.5	CP4 Sport, CP4 Pro, FP1

Red Filters

13
/ page

Red Filters for lens ports and conversion lenses:

for Fantasea Coolpix Housings and other major housing brands. Held in place on outside of lens port by o-ring friction. Sizes are determined by inner lens diameter (which fits on to the housing). We offer Red Filters that fit on the housing port as well as Red Filters which attach to the Conversion lens sets. Additional filter sizes are available by special order.

Cat no.	Part description	Lens Port Diameter mm	Fantasea Housing model
5180	Red Filter 48	48 mm	CP5, CP7 for housing port
5050	Red Filter 51	51 mm	CP3, CP3N, CP6, CP 5 and CP 7 for conversion lens set
5040	Red Filter 55	55 mm port	CP3, CP3N, CP6 for housing port
5170	Red Filter 56	56 mm port	CP4 Sport, CP 4 Pro, FP1 for housing port
5160	Red Filter 79.5	79.5 mm lens	CP4 Sport, CP 4 Pro, FP1 for conversion lens set
7160	Red Filter 87.5	87.5 mm port	CP8 for housing port
7130	Red Filter 90	90 mm	FD70, FD50 for housing ports
7170	Red Filter 96	96mm	F350D, CP8N for housing ports

Arm Sets

Fantasea Line offers a wide range of Flex Arm and Ball and Joint Arm (B & J) systems (with component parts). Fantasea arm systems fit almost all underwater photo systems. All of the arms come with base connectors for easy connection to trays and handle fittings. Special adaptors are available to fit most underwater flash units.

14
