

Example 3: Ready to Trek

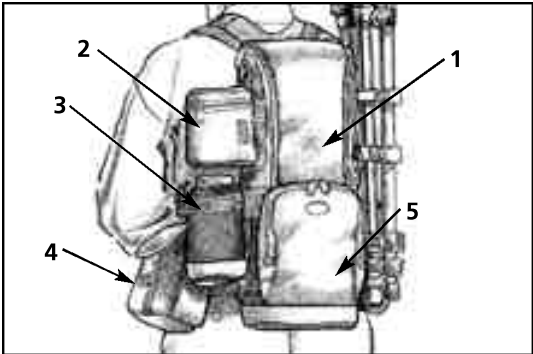

The Specialist 80 AW and 85 AW belt packs are designed to carry a substantial selection of equipment. Be sure to wear the shoulder strap or the optional Shoulder Harness for greatest support.

Core components shown:

- Deluxe Waistbelt
- Shoulder Harness

Equipment cases shown:

- 1 Specialist 85 AW
- 2 Lens Case 3
- 3 Pouch 20

Example 4: Big Glass

The Lens Trekker 600 AW can carry long, fast lenses, from 300/2.8 to 600mm, with lens hood, tripod collar and a large professional camera body attached. The optional quick-release Tripod Mount is a great way to carry a tripod and you can load up the Trekker with SlipLock cases for extra gear.

Core components shown:

- Deluxe Waistbelt
- Shoulder Harness

- 3. Bottle Bag
- 4. Pouch 50 AW
- 5. Trekker Tripod Mount w/Quick Ties (part of the Trekker AW Accessory Line, see page 8)

Equipment cases shown:

- 1. Lens Trekker 600
- 2. Lens Case 1

Example 5: Rapid Accessibility

The Vest Harness puts equipment cases on the front and sides of your body, where you'll have the quickest access to your gear.

Core components shown:

- Deluxe Waistbelt
- Vest Harness

Equipment cases shown:

- 1. Film Organizer AW
- 2. Film Drop AW
- 3. ID Pocket

How It Works - Core Components

Modular elements let you build your own system to suit your body type, your gear and your shooting style - and you can change it for every shoot. Start with one or more Core components to build the foundation of your system. Core components fit on or around your body to hold Street and Field equipment cases. With Street and Field, your gear is always protected and you never carry unnecessary weight or bulk. Whether you're an outdoor photographer, a wedding photographer or a photojournalist, you can create your own Street and Field carrying system that's customized for your needs.

Select the largest Light Belt or Deluxe Waistbelt that fits you comfortably. Selecting the largest size gives you more SlipLock Case carrying capacity. A larger size also gives you the flexibility to wear bulky clothing during cold weather.

S&F Light Belt

A lightweight belt designed to carry a moderate number of SlipLock equipment cases.

S&F Deluxe Waistbelt

A heavy-duty belt designed to carry more gear. Use it with the Shoulder Harness or Vest Harness for additional support and carrying capacity.

S&F Shoulder Harness

A shoulder harness that works with the Deluxe Waistbelt to increase carrying capacity for SlipLock cases. It also provides support for larger equipment cases.

S&F Vest Harness

A vest harness that works with the Deluxe Waistbelt to increase carrying capacity for SlipLock cases. It provides support for larger equipment cases and holds more SlipLock cases than the Shoulder Harness.

S&F Cinch Strap

A strap designed to compress and secure the load on belts, harnesses and equipment cases.
